

REGIONAL TECTONICS & BASIN STUDIES

BILL FITCHES

Bill has both academic and industrial experience. Until 1998 he taught structural geology, tectonics of sedimentary basins and many field courses at Aberystwyth University in Wales as well doing field-based research with students in various parts of Africa, China, Korea, the North Sea and the Welsh Basin. He then joined Robertson Research in N. Wales, continuing to work on basins in Libya, Algeria and West Africa, before becoming an independent consultant to the oil industry.

Magallanes Basin

His recent studies include African basins along the Atlantic & Indian Ocean margins, the Volta Basin and Patagonia, and he maintains interest in SE Asia and the Lower Palaeozoic plays of North Africa.

Algeria

Korea

Bogoria Half-Graben

Kenya Rift

Bill has given in-house industry training courses, e.g., in Algeria, Assam, Germany, & Mozambique. His field-based courses include the Kenya Rift and the Lower Palaeozoic Welsh Basin. He also passes on his experience by mentoring.
