Press Release

Chemostrat Pty Ltd are delighted to confirm we were awarded the tender from The State of Victoria as represented by its Department of Economic Development, Jobs, Transport & Resources to provide Chemostratigraphic Analysis and Interpretation.

Chemostrat will enable the Geological Survey of Victoria to better understand the petroleum system elements of the Otway Basin and thereby better constrain volumetric and spatial estimates of gas potential and gas storage potential within the Basin.

Chemostrat is the largest dedicated chemostratigraphy consultancy in the world with a track record extending more than 25 years in not only bringing this technique to the foreground in exploration but in developing, extending and enhancing return on investment from utilization of the chemostratigraphic analysis workflow in locations across the globe.

With extensive experience in Australian petroleum systems, and specific experience in the Otway basin, Chemostrat offers the capability, knowledge and experience to deliver the target of this Tender to the highest level of quality and the most efficient time-frame.
