

PETROSTRAT

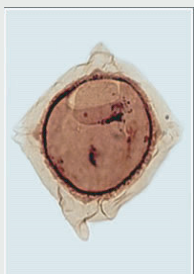

BIOSTRATIGRAPHY

PetroStrat Ltd is a biostratigraphic consultancy that provides a full suite of specialist palaeontological and stratigraphic services (micro-, nannopalaeontology and palynology) to the oil & gas industry.

Based in purpose built offices with a laboratory in Conwy, North Wales, we specialise in the provision of high resolution, quantitative regional to reservoir scale studies and wellsite biostratigraphic services.

This new facility will enable our stratigraphers to closely monitor sample preparation and will also facilitate rapid-turnaround and 'hot-shot' analyses. As well as routine studies based on our high quality data generation, we have facilities to handle and re-interpret vintage legacy data, using ODMv3™ software in-house and StratWorks™ experience.

Our 10 highly experienced biostratigraphers have practically global experience from the recent to Palaeozoic, with significant expertise in the following areas:-

North Sea (UK, Danish & Dutch Sectors)

Norway

West of Shetlands & Faeroes

Rockall Trough

East Greenland

The Caribbean, including Trinidad

Latin America, including Brazil

North Africa, including Libya,

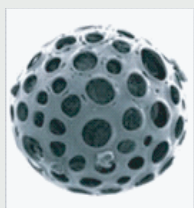

Tunisia, Algeria, Morocco

West Africa, from Angola to Gabon

Middle East

Pakistan and the Indian Sub-continent

Far East & Australasia
